Clinic on Dynamical Approaches to Infectious Disease Data

December 4-10, 2016
Jacksonville and Yulee, FL

Program Information

Overview

This intensive, 1-week clinic will provide an introduction to dynamical models used in the study of infectious disease dynamics. Instruction will focus on how the complex dynamics of pathogen transmission influence study design and data collection for addressing problems in infectious disease research. The Clinic will consist of a series of interactive lectures and tutorials that will guide participants through the uses of dynamical modeling in epidemiology. Various modeling paradigms will be discussed, with a particular focus on the development of compartmental models, and participants will be given guidance regarding the appropriate use of models to address their own research questions. Working closely with their peers and with Clinic faculty, each participant will develop a research plan that describes a roadmap for integration of dynamic modeling with data collection and/or analysis in a study system of their choosing. The research plan can be used as a framework for grant or dissertation proposals when participants return to their home institutions.

Note that we place heavy emphasis on evaluation of the program and feedback from participants. The schedule will include two group feedback sessions run by our program evaluator, Dr. Gavin Hitchcock. Dr. Hitchcock will attend the entire program and compile feedback from these sessions and individual interviews to help us improve the Clinic for future years.

Clinic goals

Our goals are for participants to leave with:

• An understanding of dynamic principles and their role in the epidemiology of infectious diseases
• A familiarity with diverse modeling frameworks
• Experience creating a model world to address a research question
• Guided experience with construction of simple models
• A conceptual framework for fitting models to data
• A set of identified resources for continued learning
**Ground rules**

- All DAIDD participants are expected to engage fully in the clinic program. This includes attending all DAIDD sessions.
- Please be aware that participants come from a wide variety of backgrounds and cultures. This diversity adds greatly to the DAIDD experience, and all participants should strive to create a welcoming, respectful learning environment.
- Laptop use will not be allowed in the lecture hall during lectures or discussions.

**Preparation**

Before the Clinic, you should:

- Fill out the attached emergency contact form
- Create a Dropbox account (register for an account at [www.dropbox.com](http://www.dropbox.com)) if you don’t already have one
- Email the following items to admin@ici3d.org by 9am Eastern on November 28
  - The email address associated with your Dropbox account
  - Completed emergency contact form
  - A recent photograph (headshot) to be used to create a directory of participants
  - 3-5 keywords that describe your research interests (e.g. pathogen or host species, location, research topics, methods, etc) to be included in the participant directory
- Prepare a short oral presentation summarizing your research (2 minutes max, 1 slide in PDF format),
- Read the pre-assigned reading and complete the pre-Clinic quiz (details to follow),
- Install the required software on the laptop computer you will bring to the Clinic,
- Work through the R Studio tutorial to familiarize yourself with this software, and
- If you are unfamiliar with or rusty on your understanding of the Binomial Distribution, work through the introductory tutorial provided

Detailed instructions and materials for preparation are available at [www.ici3d.org/DAIDD2016/preparation](http://www.ici3d.org/DAIDD2016/preparation). Materials you will need to prepare for the Clinic will be made available through the DAIDD 2016 website; however, some materials will only be available after you are given access to the DAIDD 2016 Dropbox folder.

**Logistics**

**Dress** is informal.
The climate in north Florida is mild, but some participants may find the evenings cool. Average temperatures for mid-December range from the low-to-mid 40's (overnight low; ~ 7 °C) to the upper 60's (daytime high; ~19 °C).

**Accommodations** have been arranged for all participants. On Sunday and Friday nights, you will be staying at:

The DoubleTree Jacksonville Airport  
2101 Dixie Clipper Drive, Jacksonville, Florida, 32218, USA  
Phone: +1-904-741-1997

The DoubleTree has an **airport shuttle** that can provide round-trip service to and from JAX. Shuttles will be arranged in advance, and participants arriving at a similar time will share a shuttle (so you may have a small amount of time to kill at the airport). The shuttle pick-up times will be posted in the DAIDD 2016 repository. If your flight is delayed so that you will not make your shuttle time, please call the hotel to inform them and arrange a new shuttle time.

On Monday morning, we will travel together to the primary venue for this year’s clinic, where we will stay until 4pm on Friday:

White Oak Conservation’s Conference Center  
581705 White Oak Road, Yulee, Florida, 32097, USA  
Website: http://www.whiteoakwildlife.org/wop/conferences/  
Phone: +1-904-225-3200

For most non-local participants, **expenses** associated with travel to and from Jacksonville, plus room and board during the Clinic, will be covered by the ICI3D Program. Some expenses may be reimbursed following the workshop. Questions about logistics and reimbursement should be sent to Sara Ervin (ICI3D Program Assistant) at admin@ici3d.org.

White Oak Conservation has plenty of **activities** available free of charge in your free time (kayaking, fishing, bowling, running/biking trails, pool, hot tub). Please bring appropriate clothing if you desire to participate in any of these. We will also be given a wildlife tour on their premises.

**Schedule**

The Clinic will begin the afternoon of Sunday, December 4. There will be a mid-session evaluation on Wednesday evening. The Clinic will officially end by 2pm on Saturday, December 10.

A **draft schedule** for DAIDD 2016 is available at: [www.ici3d.org/DAIDD2016/schedule](http://www.ici3d.org/DAIDD2016/schedule)
